Career Objective:

To leverage my comprehensive expertise in both front-end and back-end development as a Full Stack Developer . With a passion for creating innovative and user-centric solutions, I aim to contribute my skills in designing, implementing, and maintaining scalable web applications. I seek to collaborate within a dynamic team environment, utilizing my proficiency in technologies such as JavaScript, React, Node.js, and databases like MongoDB, to deliver robust and efficient software solutions. My goal is to continually learn and adapt to new technologies, while creatively solving complex problems, driving impactful results, and contributing to the success of forward-thinking projects.

Skills:

Extremely organized, self-motivated, team leadership, positive attitude, comprehensive problem-solving abilities, hard and smart working, willingness to learn .

Work Experience:

- Fresher

Software Skills:

- HTML , CSS
- Javascript
- React
- Tailwind CSS
- Node
- Express JS
- MongoDB

Educational Qualification:

Exam	University/ Board	Collage Name	Percentage	Year
Bachelor Of Engineering	SPPU	Zeal College Of Engineering & Research	Pursuing	-
Diploma in Computer Engineering	M.S.B.T.E.	All India Shri Shivaji Memorial Society, Pune. [AISSMS]	88.0%	2022
S.S.C	SPPU	Pius Memorial High School, Khed-Pune.	79.20%	2019

Key Projects:

Academic Project of BE	Project Name: Weather Application using REACT JS ” Project Description: The "Weather" application is a web-based tool that provides users with current weather information for a specific location. This project will be built using React JS, leveraging APIs to fetch real-time weather data and display it in an intuitive and user-friendly interface. Project Name: "TODO Application using REACT JS” Project Description: The TODO application is a task management tool designed to help users organize their tasks efficiently. This project will be developed using React JS, allowing users to create, update, delete, and mark tasks as completed, providing an intuitive and responsive user interface. Project Name: "E-commerce Application using MERN” Project Description: The TODO application is a task management tool designed to help users organize their tasks efficiently. This project will be developed using React JS, allowing users to create, update, delete, and mark tasks as completed, providing an intuitive and responsive user interface. Project Name: "Blogging Application using MERN” Project Description: A Blogging Web Application using the MERN (MongoDB, Express.js, React.js, Node.js) to manage authentication of users , posts , admins , comments. To showcase a dashboard of overall users , posts , comments , number of likes to comments and to perform CRUD operations on all the roles , except the admin users as the work as controllers.
